

LAWYERS LEADERS, SAYS MATTINGLY

Tells Bar Association They
Should Not Be Com-
mercial.

Justice Harlan Deplores
Proposal for Election of
Judges.

Chief Justice Clabaugh
Wants New District Court
House.

About 150 members of the Bar Association of the District of Columbia sat down to their annual banquet last evening at the New Willard.

William F. Mattingly, president of the association, was toastmaster. He reviewed the history of the association from its inception, in May, 1871, showing how it had developed, until now there were in the library of the association about 15,000 volumes. Mr. Mattingly made a strong plea to the members to make the Bar Association a greater force for civic righteousness in the District than it had been. He thought the lawyers of the community should be its leaders.

Chief Justice Clabaugh, of the District Supreme Court, responded to the toast for his court. He humorously described the wide range of subjects coming before that court for consideration. His special plea was for better quarters for the Supreme Court. He deplored the condition of the present court house, and said that a new building might be provided, or at least the present one renovated to conform to the needs of the courts.

Justice Harlan, of the Supreme Court of the United States, was then called upon by President Mattingly. This tendency he greatly deplored, contending that it was the prerogative of the lawyer in a republican state to be its leading citizen.

He said he had often asked himself "What is in store for the Supreme Court for the future?" The theories advanced that judges of the higher courts should be elected by the people, and other agitations for changes in the fundamental law, were not reassuring. He would not venture to predict what the outcome of all this disquietude would be, saying that nothing would surprise him these days, still he had an abiding faith in the sound judgment of the people of this country. It was his opinion that the best form of government is the one which the people could not be improved upon.

The Court of Claims was responded to by Chief Justice Peelle. He reviewed the history of the court, going into detail as to its functions. Justice Peelle also made a strong plea for a world tribunal of last resort to come out of the next peace conference at The Hague. Henry E. Davis brought the banquet to a close in a witty and serious response to "The Profession."

The guests of honor included: The Justices of the Supreme Court of the United States.

The Justices of the Court of Appeals. Col. James O. Payne, John W. Young, Harry W. Hodges, Aulic Palmer, Archibald Hopkins, and Mrs. James M. Tanner.

NO FUNDS AVAILABLE
FOR FREE SKATING RINK

During his recent business trip to Mexico, Commissioner West, who had been constructed for use by the children of the city as an outdoor rink for roller skating.

Upon his return to the city, Commissioner West suggested to Colonel Brown, Superintendent of Public Buildings and Grounds, the construction of a similar institution in the Monument grounds or on the Potomac flats, stating that it would afford outdoor recreation to large numbers. Commissioner West has received a letter from Colonel Brown, stating that the suggestion is a valuable one, but unfortunately there are no funds to meet the cost of laying the asphalt bed.

NEED GOOD ADVICE

Simple Formula Gives Immediate Relief

The digestion of food commences as soon as it enters the mouth. Its presence excites the action of the salivary glands; and mastication, or chewing of the food, causes it to become thoroughly mixed with saliva, which is the juice of those glands; and this juice acts upon the starch food to aid in converting it into glucose, an essential condition for digestion.

A knowledge of this fact alone explains one of the greatest causes of Dyspepsia—rapid eating. The most fattening foods, such as oatmeal and other cereals, are often swallowed without being mixed with saliva; and entering the stomach in an improper condition, they are not fully digested, and in many cases they cause a loss of flesh by burdening the stomach and other digestive apparatus with food that cannot be assimilated, therefore, it can easily be seen that an agent to stimulate the gastric secretions is needed; in such cases the following formula has proved of great value:

Tr. Cinchona Compound, 2½ oz.;
Kastor Compound, 1 oz.; Fluid Ex-
tract of Cascara, Aromatic, 1 oz.
You can have this prepared at
your family Drug Store at a small
cost.

Big League Brush Welders At New Academy of Design Make Punk Hit With "Tad"

Much-Vaunted Moonlight Scene Could Just
as Well Have Been Called "a Yard of
Fog" or Anything Else.

TAD AT RINGSIDE.

NEW YORK, April 18.—The National Academy of Design is the "big league" of brush welders. In order to break into the big league you have to be fast on the bases and have the punch. Quite a few good men have had the nix sign hung on their stuff, but the judges piped some weakness and held them out.

There are something like 400 pictures in the exhibition this year. They run from portraits to landscapes and then back to still life in carrots and turnips. Lockwood de Forest's Gem.

No. 376, "The Lost Brook in the Desert," by Lockwood de Forest. Is a gem of scintillating atmosphere. Five large rocks surrounded by a dash of spinach are in front, while in the rear is a vast desert through which runs a tiny stream. That is the brook. Much valuable advertising space was wasted by the artist.

No. 380, a portrait of "Miss H.," by Laura Combs Hills. Was the bunk "Miss H." was trimmed good and plenty. She paid for a portrait of herself, but it was all hat. Two feet of the canvas was hat, six inches portrait, which peeked from under, and then was a black robe.

Albert Groll Painted This One.

No. 32, "La Guna, New Mexico," was a grand hit. Albert Groll, who painted it, made a mistake in not using more canvas. He crowded at least twenty fine, ripe clouds on the piece and then suddenly remembered that he had to paint the little town yet. He had not got it in on the bottom, but should have

had a foot more on either side, as some of the clouds were frightfully crowded. No. 25, "Dr. Charles Grier," by E. Wyly-Grier. Was a study in brush. There are more whiskers on this five feet of cloth than you ever saw in an audience in your life. They were as loose as ashes, too, and flew all over the frame. Mr. Grier has a flowing style and ought to be a master at painting kite tails and the like.

"November Sunrise" a Puzzle.

No. 252, "November Sunrise," by Leonard Ochtmann. Was a gem. It looked like a composite picture of a flock of steam. Just where the sunrise was or is, is the puzzle. The mysterious Mr. Raffles was easy as compared with this puzzle. No. 1, "Aunt Fanny," by J. Campbell Phillips. Is nice. Aunt Fanny once posed for Quaker Oats and lost her smile. Maybe Aunt Fanny had just won some prize. At any rate, she is a sweet thing if she looks as J. Campbell painted her.

"Black Bird Hill."

No. 110, "Black Bird Hill," is another of those fade-away landscapes. By naming them the artists save the lovers of painting much trouble. This might just have well been named "a yard of fog." There is a moon and some dark stuff which looks as though it was meant for bushes.

No. 7, entitled "Winter in New York," is a very expressive thing. You see the cab horses "wondering" where they stand and the driver wondering about the charge he is going to make; the cop on the corner wondering where he can get a shot of booze, and the flakes of snow like sawdust and the atmosphere of—oh, what great atmosphere frostings on budding! Very chilly stuff.

SUICIDE MANIA HAUNTS WIFE

Quaker Couple Divorced on
Application of the
Husband.

ADRIAN, Mich., April 18.—Arthur E. Mosher has been granted a divorce from Sarah Comfort Mosher, for alleged cruelty of an unusual nature. Shortly after the marriage he claimed, his wife wanted him to enter into a suicide agreement, but he declined.

Later they occupied separate bed rooms, and one night, he testified, she came into his room after he had retired and uncovered the magazine of the coal stove so the fire would escape. Another time, while out driving, he said she wanted him to drive in front of an approaching train. Both are Quakers.

PATRICK'S PROTEGE
LOSES HIS APPEAL

Upon motion of Assistant Attorney General Cooley, of the Department of Justice, the Supreme Court of the United States has dismissed the appeal of John Johnson, of Yonkers, N. Y., from the decision of the court of appeals of New York, which denied him a new trial for the alleged murder of his wife, Patrick, and it is believed that it was through tips from Patrick that Johnson has secured the delay in his case.

PITTSBURGH, PA. GIRL
DEAD FROM OPEN GAS JET

NEW YORK, April 18.—Mystery surrounds the death of Miss Catherine Jordan, twenty-five years old, a handsome brunette, who was found dead in bed in a furnished room house at 141 West Thirty-fourth street, early today, asphyxiated by gas. The gas was flowing from a gas stove in the room, and the girl had been dead some time when found.

Miss Jordan came from Pittston, Pa., intending to go on the stage, where she has a sister, Irene, now with the Mantel company. She failed, however, to get an opportunity, and made her home with Mrs. Jessie Smith, proprietress of the rooming house, where she met her death.

THROWN BY DONKEY, ASKS FOR DAMAGES

Wants \$12,150 in Return for
Ten-Cent Ride on
Burro.

LOS ANGELES, April 18.—Donkeys and mules are unreliable means of transportation, according to a complaint filed in the superior court by Harry Finkelstein, asking \$12,150 damages from the Lehigh Investment Company.

The complaint alleges that James B. Lehigh, of the Chutes Park and Zoo, the owner of donkeys that are "wild, untrained, vicious, and unfit for use by the public."

Mr. Finkelstein paid 10 cents for a ride on one of the donkeys, according to the affidavit, and enjoyed part of the ride, but the trouble arose when the donkey began to act like a broncho and threw him off.

Mr. Finkelstein sustained injuries, he says, which entitle him to damages in the amount stated.

PUGILISTIC PREACHER
RESENTS AN INSULT

STERLING, Ill., April 18.—Dr. E. F. Eskey, of Prophetstown, for many years a leading Republican of Whiteside county, and now chairman of the Republican county central committee, was knocked down and badly beaten by the Rev. William Fundston, pastor of the Methodist Church of Prophetstown.

Dr. Eskey questioned the right of the pastor to deliver a political sermon, and this was followed, it is alleged, by his calling the preacher an objectionable name.

Eskey refused to retract the statement or name, whereupon the preacher pounded him unmercifully. Dr. Eskey is a member of Mr. Fundston's church.

HILLARD, B. & O. BUILDER,
DIES AT THE AGE OF 81

PARKERSBURG, W. Va., April 13.—James W. Willard, aged eighty-one years, a civil war veteran, was found dead at his home here this morning. He was a pioneer in the construction of the Baltimore and Ohio railroad from Washington into this State.

ONE THOUSAND QUAKE VICTIMS IN MEXICO

Greatly Increased List
of Dead and Hurt
May Come.

EL PASO, April 18.—More than 1,000 persons were killed in the earthquake which devastated the territory southwest of Mexico City.

The list of dead may be increased greatly according to late dispatches received here today from the affected country. New volcanoes have broken out, and the burning lava has set fire to the forests, and people and live stock are fleeing for their lives.

Scores of towns lying between Mexico City and the Pacific ocean have been wiped out by the earthquakes. In many instances the earth opened and in the great chasms thus formed swallowed whole villages.

Starting Point of Disturbance.

The greatest damage resulted between the City of Mexico and the Colima volcano, which seemed to be the starting point of the disturbance. Colima is now in violent eruption, and no estimate can now be placed on the extent of the damage done or yet to be done.

One of the most alarming features of the dispatches received here is the indication that there has been a large loss of life in the City of Mexico, a fact which the authorities are trying to suppress. Efforts to communicate with the authorities have failed, but private advices to commercial houses say that the loss of life has been heavy and that no announcement will be made by the officials.

Severest in History of Country.

This series of earthquakes was the most severe in the history of the country. Not only did the disturbance extend from Mexico to Colima, but there was a great disturbance on the bottom of the Gulf of Mexico.

Fishing boats returning from the red snapper banks report that they were overtaken by most remarkable storms, in which cross tides attacked them, water spouts appeared and great columns of steam shot from the ocean. Several of these boats were made so hot by the steam from the sea that the fish which they were packed was melted.

Many Railroad Lines Destroyed.

All the railroad lines in the southern and western part of Mexico have been practically destroyed. In scores of places the roadbed was carried completely away.

Traction of the government's measures of relief. The bishop of Chiapas telegraphs that the destruction of Chiapas was almost complete, that in many instances whole families were killed, and that the need of relief is urgent.

Remarkable Escape of Students.

A remarkable instance of escape from death of seventy students comes from Santa Julia. The Galestano College building located there collapsed, while seventy of the students were inside. All escaped injury, however.

The tidal wave, which swept over the town of Acapulco, did great damage. This tidal wave led the meteorologists to believe that the earthquake was of world-wide dimensions.

A message from Acapulco confirmed the story of the total destruction of the town. The town and hospital collapsed, but the prisoners and patients were taken out safely. Factories throughout the district are in ruins, and thousands of workmen will suffer dreadfully from the loss of their homes and enforced idleness.

Four Continents
In the Throes
Of Earthquakes

NEW YORK, April 18.—Dispatches received from four continents today indicated that the whole world has been in the throes of a remarkable series of earthquakes.

Violent earthquakes are reported in the Russian trans-Caspian territory in Asia.

MRS. NAU FALLS OUT WINDOW
AND BREAKS HER LEG

Falling from a third story window of her home late last night, Mrs. Christina A. Nau, proprietor of a saloon at 1292 Seventh street northwest, is in the Emergency Hospital, suffering from a fracture of the left leg and bruise about the body. Her condition is not considered serious.

Mrs. Nau told the doctors she was leaning out of the window when she lost her balance and fell to the yard below.

Mrs. Nau is a widow, her husband having died about a year ago.

HAVE YOU SEEN MR. UNDERWOOD?

He's Wanted for Having
Too Many Wives and for
Getting Money Easy.

CHICAGO, April 18.—William G. Underwood, former general Western sales manager for the Fairbanks-Morse Company, was formally charged last night with having led not a dual but a quadruple existence. He is said to have made a collection of three happy homes, three very unhappy "wiv'-s," and a "bride to be."

Just as Mr. Underwood was preparing to rent the fourth little "happy home" for his fourth bride, the three other Mrs. Underwoods got together. Other warrants were issued by the Fairbanks-Morse Company, charging Underwood with having collected money on bogus checks.

Dora Underwood claims the proud distinction of being the first Mrs. Underwood. She was married to Underwood in Danville, Ill., December 8, 1893. Edna Le Pol Underwood is the second. Last night she exhibited a certificate attesting to her marriage to Underwood in Shear City, 10 weeks ago. The third wife is alleged to have been married in Sioux Falls. The bride-to-be is a Chicago woman, whose name has been suppressed. One hundred dollars for Underwood's arrest is offered by the Guaranty Bond Company of North America.

BIG PACIFIC FLEET ADVISED BY EVANS

Sixteen battleships in each of the two American naval fleets are advocated by Rear Admiral Robley D. Evans, commander-in-chief of the Atlantic Fleet, who has come to Washington for a conference with Secretary Metcalf and Rear Admiral Converse on the naval program at the Jamestown exposition, to report informally on the work of his fleet in Southern waters the past three months and to outline a program of work for the summer, aside from the duties in connection with the exposition.

"I think we should have battleships and fleet tactics in the Pacific, but I believe it would be a fatal mistake to withdraw battleships from the Atlantic for that purpose," said he, in an interview. "When the navy is built up to its proper proportions, I believe we should have sixteen battleships on the Atlantic and sixteen on the Pacific. These would form a great school for our officers and men, and would be a most valuable lesson for any one thinking of object with us. This latter expression apparently reflected upon the vital interest of the United States, which alarmists declare are being coveted by the power of the far East."

Rear Admiral Evans brought to Washington reports of the straightest and fastest shooting ever done by American blue-jackets, but, owing to orders of the department, he could not discuss the maneuvers or target practice.

MISSIONARY AND DEACONESS
SCHOOL'S COMMENCEMENT

The commencement week of the National Training School for Missionaries and Deaconesses, 1259 North Capitol street, will begin May 17.

The program is as follows: Friday, May 17, 10 a. m., closing exercises of the kindergarten; 8 p. m., class day exercises. Sunday, the 19th, 11 a. m., annual sermon at Washington, D. C., by the Rev. George E. Maydwell, D. D.

Monday, the 20th, 8 p. m., hospital night, address by the Rev. Merrill E. Gates, D. D. Tuesday, the 21st, 8 p. m., annual musical; Wednesday, the 22d, 8 p. m., graduating exercises, address by Mrs. Walter P. Thirkield.

All of these exercises, with the exception of the annual sermon, will be at the chapel in Rust Hall. The graduates from all the departments of the school this year number forty-seven.

MRS. NAU FALLS OUT WINDOW
AND BREAKS HER LEG

Falling from a third story window of her home late last night, Mrs. Christina A. Nau, proprietor of a saloon at 1292 Seventh street northwest, is in the Emergency Hospital, suffering from a fracture of the left leg and bruise about the body. Her condition is not considered serious.

Mrs. Nau told the doctors she was leaning out of the window when she lost her balance and fell to the yard below.

Mrs. Nau is a widow, her husband having died about a year ago.

SINCLAIR FREED ON FOURTH TRIAL

Accused "Doctor" Made Im-
passioned Plea in His
Own Behalf.

BOSTON, April 18.—"Dr." John Sinclair is not guilty. The fourth trial of this now famous man came to an end today when Judge Brown opened the sealed verdict found by the jury yesterday afternoon. Sinclair was charged with causing the death of Anne M. Russell by means of a criminal operation on February 4, 1906. The first trial resulted in a disagreement. The second trial was taken from the jury owing to charges of jury bribery for which two members are now in prison. At the third trial Sinclair was convicted, but on appeal the supreme court granted him another chance.

The verdict rendered today was largely due to the impassioned plea made by the prisoner yesterday in his own behalf while acting as his own attorney.

Sinclair seemed dazed by his good fortune, and staggered as several sheriffs helped him from the court room.

ELUDE BRIDE'S FATHER; YOUTHFUL PAIR ELOPE

EASTON, Pa., April 18.—Jonas F. Brier, of this city, and Miss Hazel Wise, of Hazleton, eloped and went to Huntington, N. Y., and were married. Brier is eighteen years and bride sixteen. The pair returned to Hazleton, and apparently were forgiven by the bride's parents.

Mr. Brier and his wife suddenly left the Wise home and came to Easton to live with Brier's parents. The young wife's parents followed, with the object of bringing them home. After consulting an attorney the girl was given in charge of her parents, and they were told they could take her home.

While the parents were waiting with their daughter at the station to take a train, young Brier, accompanied by an officer, came to the depot, and Mr. Wise was asked to come out to meet a friend. When the girl's father was on the platform, Brier slipped into the back of the train and was away and the pair quickly disappeared.

The parents have dropped all proceedings.

ELKS ATTENDING FUNERAL MAKE MISTAKE IN CORPSE

AUBURN, N. Y., April 15.—A delegation of Elks who arrived here with a body for burial, supposed to be that of George C. Young, learned to their surprise that the dead man was George Hersom Young, and that he did not belong in Auburn after all.

Conversation among the corpse caused some of his Lewiston relatives to suspect that there was some mistake, and when the coffin was opened the features revealed were strange to all who knew the supposed dead man.

The last known about George C. Young, he was living in Holyoke, Mass.

One of the Elks who took the corpse caused some of his Lewiston relatives to suspect that there was some mistake, and when the coffin was opened the features revealed were strange to all who knew the supposed dead man.
